COMPANY OVERVIEW

Specialty Metals is a family-owned and operated business that has been a leading worldwide distributor of high-end, rare, and heavy-duty metals since 1987. We specialise in providing quality corrosion-resistant and high-temperature alloys for critical applications and refined service applications across a variety of industries as diverse as the mining, aerospace, and R&D sectors.

Drawing from some of the largest producers from across the globe, we offer hard-to-find alloys and product forms. We also value-add to our materials by offering cutting, machining, forming, and welding to customer requirements.

Trust us to provide you with the metal solutions you need for your toughest challenges.

WHY CHOOSE US?

Experience the difference of working with an Australian-owned family business that prioritises exceptional customer service and quality metal products.

Choose us because we are an Australian-owned family business that places exceptional customer service at the forefront of everything we do. Our immaculate warehouse facilities stock premium quality alloys, and our rare metal sourcing capabilities ensure we can meet your unique needs.

With our fast and flexible order supply, we make sure your projects are completed on time and within budget. We are dedicated to delivering the highest level of service and quality, whether you need a standard product or a custom solution.

Trust us to source and deliver rare metals with fast and flexible order supply to meet your unique requirements and exceed your expectations.

OUR SERVICES

Our company provides a comprehensive range of metal supply services to meet the needs of a wide range of industries.

We'll help you find the right materials for your project, and our quality control procedures ensure the products we deliver meet the highest standards.

In addition, our trading and indent services provide access to a wide range of metal products. We are also experienced in sourcing rare and hard-to-find metals and products. No matter what your metal supply needs are, we are dedicated to delivering reliable and quality services.

From quality control to rare metal procurement, we offer a comprehensive range of metal supply services to meet the unique needs of your industry. Our expertise and dedication to quality ensure that you receive reliable and superior service every time.

MATERIAL SOURCING

Our sourcing service specialises in finding the right metal materials for your project. With our extensive supplier network and deep knowledge of the industry, we ensure you receive high-quality metal materials at competitive prices. Allow us to help you source the right metal materials, no matter how specific your requirements are.

QUALITY CONTROL

Our quality control service ensures that the metal products we deliver meet the highest standards of quality, durability, and reliability. We use advanced testing and inspection techniques to verify that the products meet or exceed industry standards. Rest assured, we'll deliver metal products that are of the highest quality and reliability for your projects.

TRADING & INDENT SERVICES

Our Trading and Indent services provide you access to a wide range of metal products from local and international suppliers. We offer flexible trading terms and can manage the logistics of importing and exporting metal products. We'll help you find the right metal products for your project, no matter how complex your requirements may be.

RARE & HARD-TO-FIND MATERIALS

Our rare and hard-to-find materials service specialises in sourcing unique metal materials and products that are not commonly available on the market. With our extensive network of suppliers and our expertise in the metal industry, we can find the right solution for your toughest metal material challenges. Trust us to deliver high-quality and reliable metal materials, even for the most unique and niche projects.

ROUND BAR

Our selection of metal round bars is made from premium quality titanium, stainless steel, nickel-based alloys, and carbon steel. These round bars are specifically designed to endure high-stress environments and are ideal for various industrial applications. With our commitment to providing durable and reliable metal products, you can rely on us to supply you with the right metal round bars to meet your project requirements.

SHEET & PLATE

Our sheet and plate metal products are made from high-quality materials such as titanium, stainless steel, nickel-based alloys, and carbon steel. These materials are versatile and can be used in a variety of industrial applications. You can count on us to provide you with durable and reliable sheet and plate metal products to meet your unique project needs.

WELDING WIRE

Our welding wire products are crafted from premium quality metals such as titanium, stainless steel, nickel-based alloys, and carbon steel. These metals are selected to ensure excellent welding performance, durability, and reliability. Our expertise and commitment to quality make us the perfect choice for sourcing the right welding wire products for your project.

TUBE AND PIPE COMPONENTS SUPPLY

We offer a range of premium quality pipe and tube components made from corrosion-resistant, high-temperature super alloys, titanium, stainless steel and copper-based alloys for various industries.

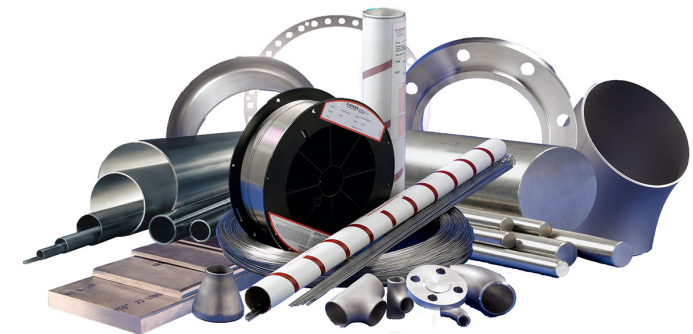

OUR PRODUCTS

Specialty Metals understands your metal needs, offering a range of high quality materials from stock as well as across the globe from our long-term trading partners.

Here at Specialty Metals, we provide a selection of metal products such as titanium round bars, sheet and plate metals, and welding wire. Our specialties include titanium, nickel alloys and stainless steel.

These products are suitable for use across a range of industries, such as construction, manufacturing, aerospace, and more. Our focus is on delivering durable and reliable metal products that meet your unique project needs.
